| Section                     | Description                                                                                                                                                                                                                                                                                                                                                                                                                |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Project Overview            | The project develops an interactive business intelligence architecture to analyze multi-decade agricultural production across 30+ states and 600+ districts (1997–2021). The resulting Tableau dashboards provide clear insights to assist stakeholders in boosting productivity and minimizing risk.                                                                                                                      |
| Data Collection Plan        | <ul style="list-style-type: none"> <li>• Extract multi-year district and state agricultural records from government open portals.</li> <li>• Capture spatial attributes (State, District), temporal attributes (Crop Year, Season), and production figures (Area in Hectares, Production Quantity).</li> <li>• Ingest and validate data schemas into structured analytical tables for high-performance querying</li> </ul> |
| Raw Data Sources Identified | <b>Raw Data Sources Identified</b><br><b>Ministry of Agriculture (DES / APY Corpus):</b> Official Area, Production, and Yield statistics across 30+ states, 56+ crops, and 5 cropping seasons (1997–2021)                                                                                                                                                                                                                  |
